340B: Education, Compliance & Savings for Hospitals

TRAINING DESCRIPTION

Safety net providers play a crucial role in providing affordable healthcare services to underserved populations. The 340B Drug Pricing Program is a valuable program that enables hospitals to stretch scarce resources and improve patient access to medications. However, the 340B Program is currently facing numerous challenges, including regulating changes, restrictions imposed by manufacturers, and complex compliance requirements. Navigating these challenges can be daunting for organizations participating in the 340B Program.

Our comprehensive 4-hour Bootcamp presentation is designed to equip hospitals with the knowledge and tools needed to successfully navigate the 340B Program. We will provide an in-depth overview of the program, discuss the pillars of compliance, and offer insights into Medicaid billing and preparing for HRSA audits. Participating will also learn about internal oversight and controls, profitability tracking, 340B savings tools, contract pharmacy networks, and strategic approaches to maximizing the benefits of the program. Additionally, we will explore advocacy efforts and provide an outlook on the future of the 340B Program.

By gaining a solid understanding of the 340B Program, hospitals can enhance their ability to comply with program requirements, optimize savings, and continue to provide essential healthcare services to their communities.

AGENDA

Tuesday, February 27 11:30 a.m.– 4:00 p.m. ET
